

SPECIAL EFFECT RANGE

Glitters, Shimmers and Metallic Liquid Inks

- **Glitter:** Glitters use big flake finish to create brilliantly dazzling prints. For added impact, tint the glitters or print over a plastisol color as a base.
- **Shimmer:** Shimmers use fine detail flakes with a light ink deposit feel to produce dramatic, unique effects while maintaining excellent durability. Customize shimmers by adding plastisol colorants.
- **Metallic Liquid Silver and Gold:** Liquid gold and silver effects use a very fine leafing flake to produce an opaque, wet metallic chrome or gilded look with a smooth, soft feel.
- **Stretch White:** Low cure plastisol ink with exceptional stretch and adhesion properties. Stretch White can be used as an under base to add elasticity to prints when cotton colors are printed on top.
