DTF APPLICATION
ROQ IMPRESS

NEW

*P6C2 - Considering 10 seconds fixation time & prepress: 300 pieces per hour
P6C3 -Considering 10 seconds fixation time (5+5) & prepress: 500 pieces per hour

DTF APPLICATION **ROQ IMPRESS**

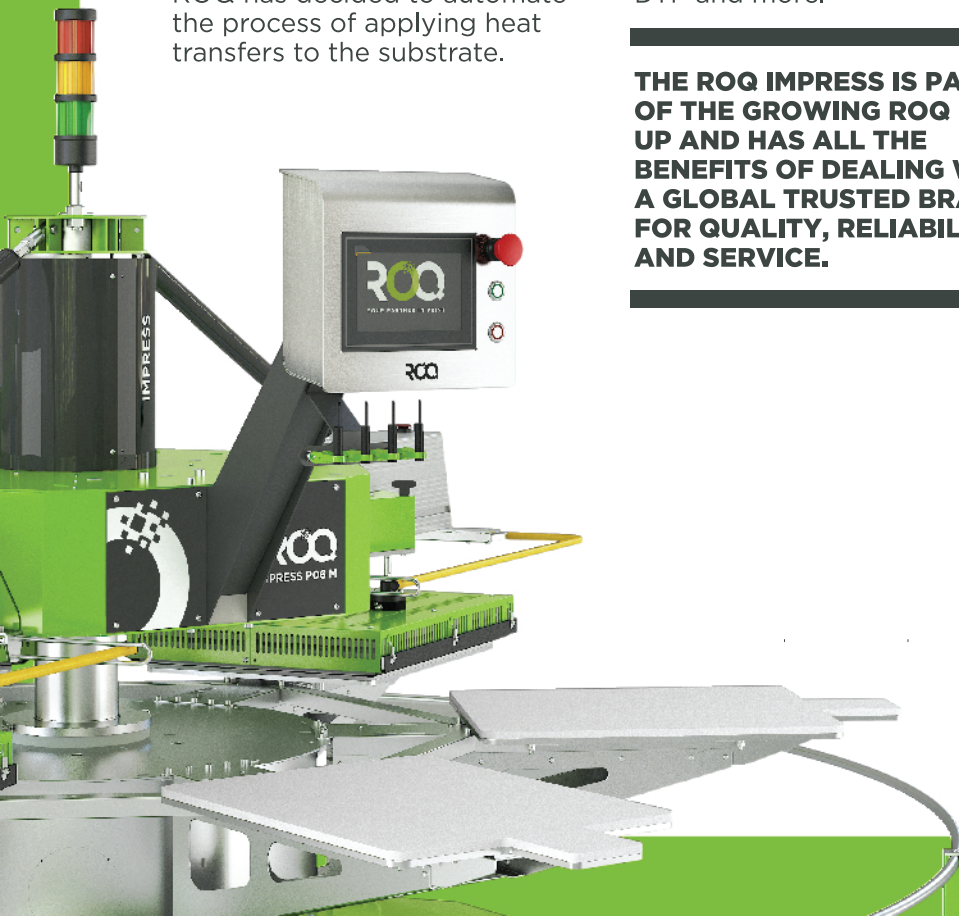

Transfers have been a garment decoration method for many years but over the last few years with companies making it easier to order custom transfers and the innovative Direct To Film options it has really grown very quickly.

Transfers and Direct To Film DTF's are great for specialty fabrics and hard to print items. ROQ has decided to automate the process of applying heat transfers to the substrate.

The Roq Impress can reach up to 500 pieces per hour saving time and making the application process streamlined. Using a circular machine, rubber top pallets and 2 or 3 heat presses it makes application of transfers easy as 1-2-3.

Applications for player numbers, vinyl, cad-cut, and add-ons like twill, rhinestones, foil, transfers, DTF and more.

THE ROQ IMPRESS IS PART OF THE GROWING ROQ LINE UP AND HAS ALL THE BENEFITS OF DEALING WITH A GLOBAL TRUSTED BRAND FOR QUALITY, RELIABILITY AND SERVICE.
